**How to Edit Your Affiliate Links in  
Ebooks Using Nitro PDF**

This is how your trial version of Nitro PDF should look your, once installed.

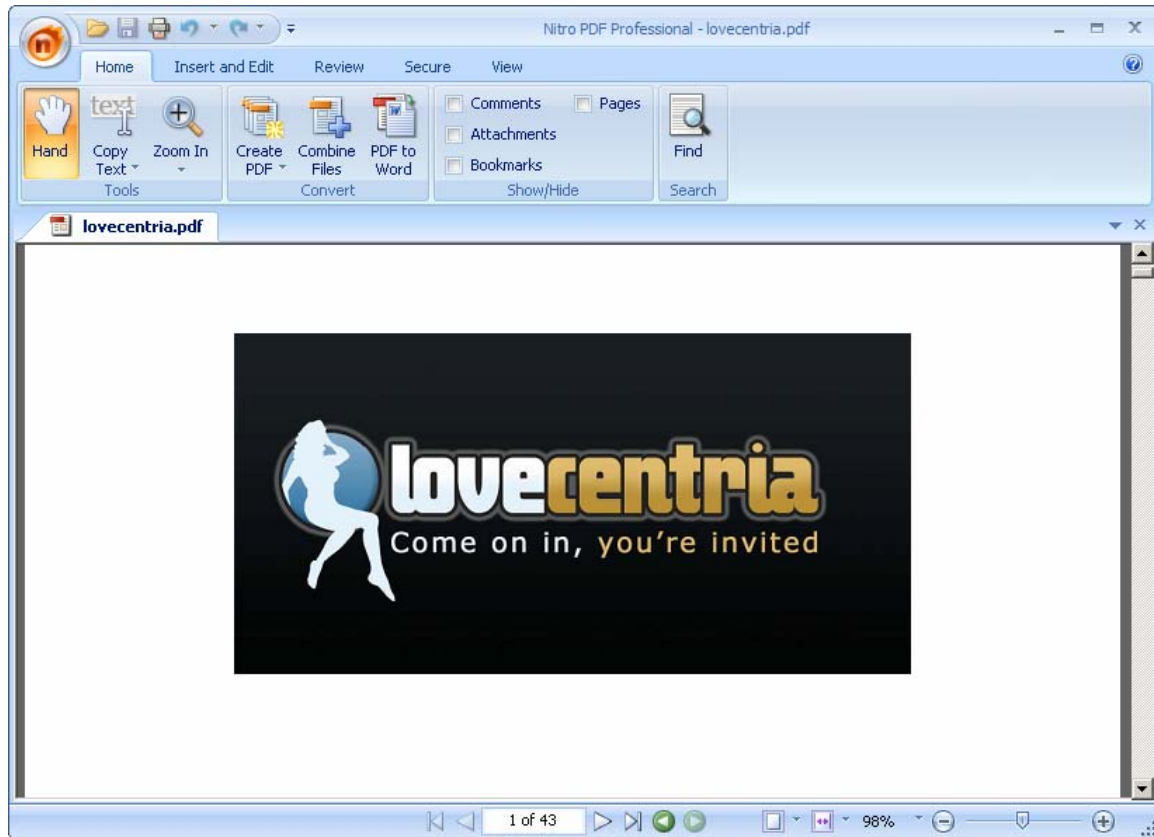

To start, click the *Continue* button.

Then using the *Open* button, open the ebook for editing. You can also press CTRL + O on your keyboard.

See the open button (yellow folder) at the top of the window? Select the file and click Open.

Once that's done, the ebook should open and look like this.

Switch to the *Insert and Edit* Tab by clicking it - shown here with a red border:

Then click on the *Link* button - shown here with a red border.

Once you click this button, the mouse cursor will change to a "+" and you will be able to select regions, such as images or text.

## Linking an image

Simply select the area you want to appear as a link. This window will pop up.

**Create Link**

**Adding links to your document**

To start, select the type of link action to perform: go to a page in a PDF file, open a webpage, or open another file.

Next Cancel

What you see here are the default options. You can select the link appearance, link color, line thickness, highlighting style, etc

As for link action – you will need to use the 2<sup>nd</sup> option – *Open a Webpage*. Once all settings on this form are set up, click the button – *Next*.

In this window enter your linking code and click ok.

**Edit Web Link**

Enter a URL (a webpage address) to link to:

http://track.lativio.com/hit.php?w=xxxxxx&p=2&s=37

OK Cancel

You can get your linking codes from webmaster area. They are located here:

<http://webmasters.moreniche.com/webmasters/index.php?maina=links>

As the end result, around the image you will see the blue border. Once the file is saved and viewed with Adobe Acrobat Reader, the link is clickable and will open the Lovecentria website with your cookies set! So now, every sale made will be credited to your account!

## Lovecentria™ and Sex Advice

That's where Lovecentria™ fits in. Rather than just creating a random selection of information, we've created an exact step by step guide to better sex. We'll take you from the very beginning of understanding your own body, right the way through to the most exciting sex positions ever experienced.

## Putting link around text

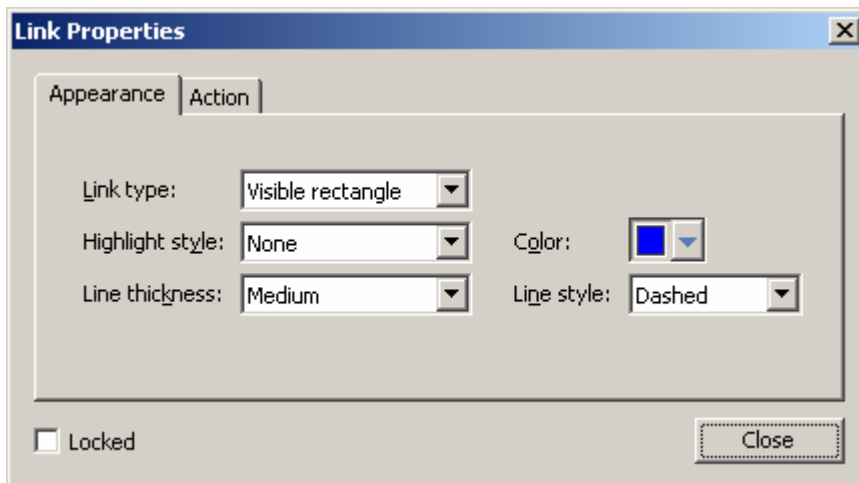

To put links around text, you have to follow the same principles.

Click on the Link button (shown with red border).

Select the text you want to link.

For example, for selected text you can set properties like these:

The result will be like this:

Nitro PDF Professional - lovecentria.pdf

practice for that big night with your lover as well as giving you all the health and sexual benefits of that.

**Step Two- The Art of Kissing**

It's long been assumed that kissing is perfected around the age of 13 and there's not a whole lot you can do once you've learnt. Improving kissing is not sex after all, right? Wrong, kissing is essential in attracting and seducing women. If you're a bad kisser then the chances are that she'll think you are a bad lover.

That's crippled your chances even before you've got in the bedroom. That's why we've put together Step Two, to basically retrain you in the art of kissing. Once you've read through this step you'll have learnt just how important it is and what steps you can take to improve your style. Don't worry these are tips you can try out on your partner, there is no kissing of oranges or the back of your hand in this guide.

## Editing/updating existing links

Editing links in Nitro PDF is a little more complicated. To edit an existing link, take these steps.

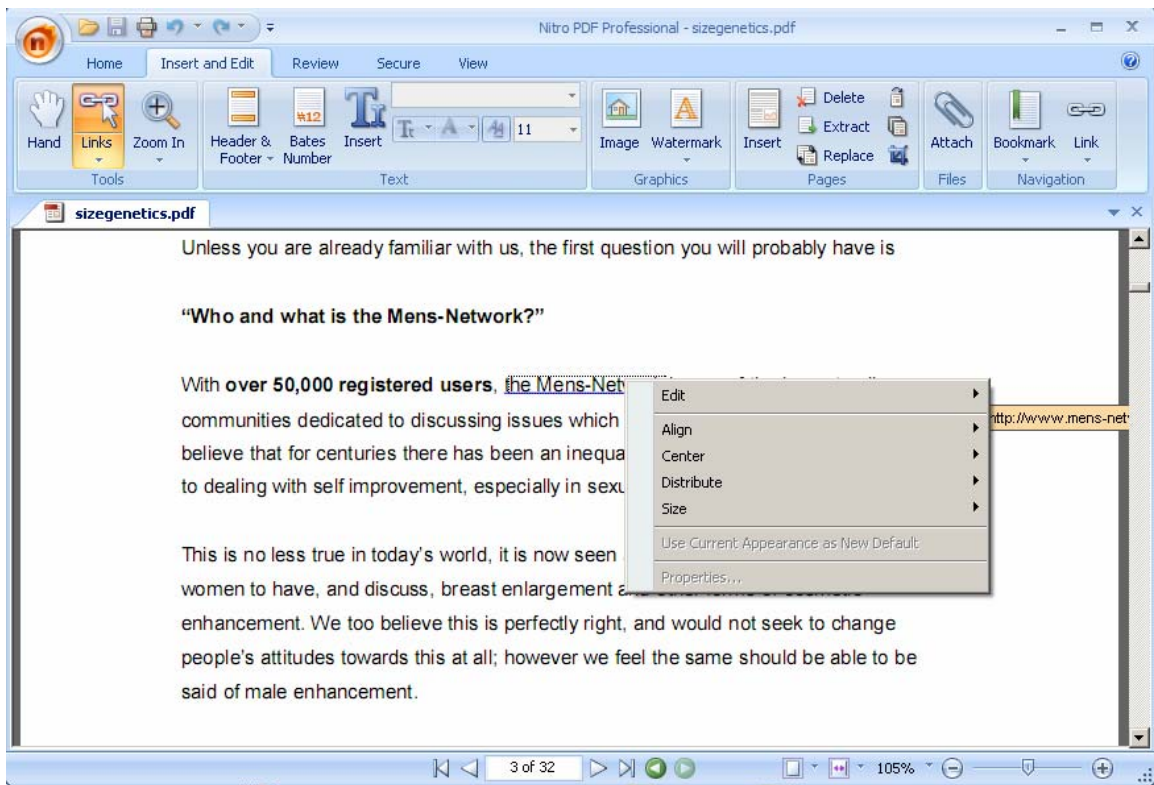

Click on the Link button (shown with red border).

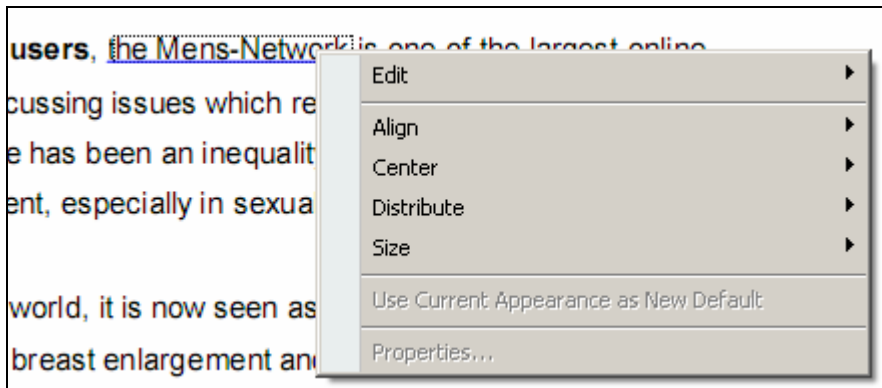

Select the area of the current link. In this picture below "[the Mens-Network](#)" is linked.

The next step is to click on the center or right side of the link, which should result in following menu.

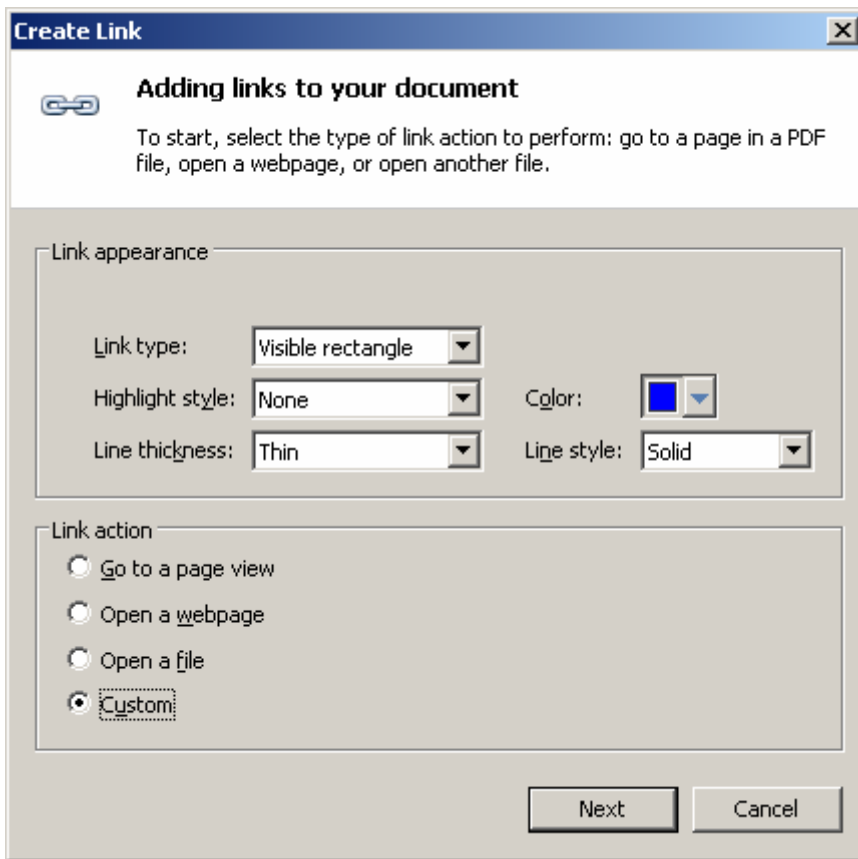

This menu is useless, since it doesn't allow you to do anything with the link. All options are disabled. Now here comes the trick. You should click now with the left mouse button in this dotted surrounded area.

This will make the link look like this. Then this dialog will pop up.

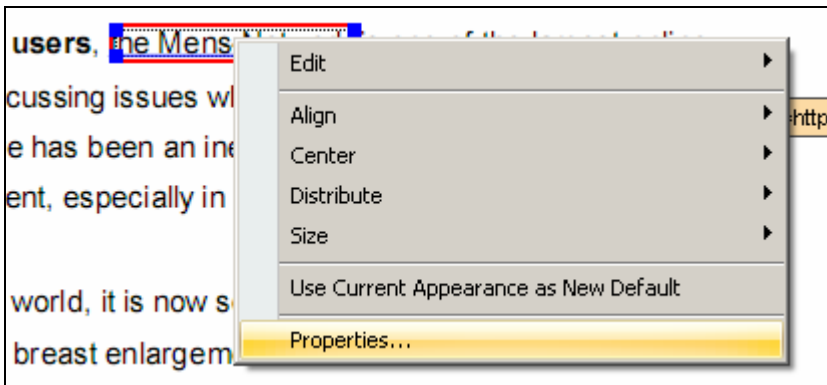

This is the “Create link” option, but we don’t need this, so click Cancel or hit the ESC button on your keyboard.

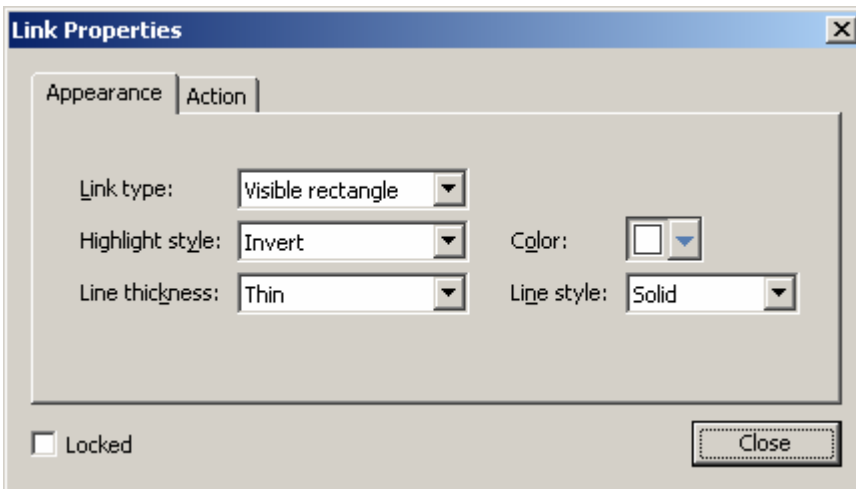

Now, click again in this dotted area and the result should be like this.

The link now is selected! Use Right click, and this time you will be able to pick the Properties menu.

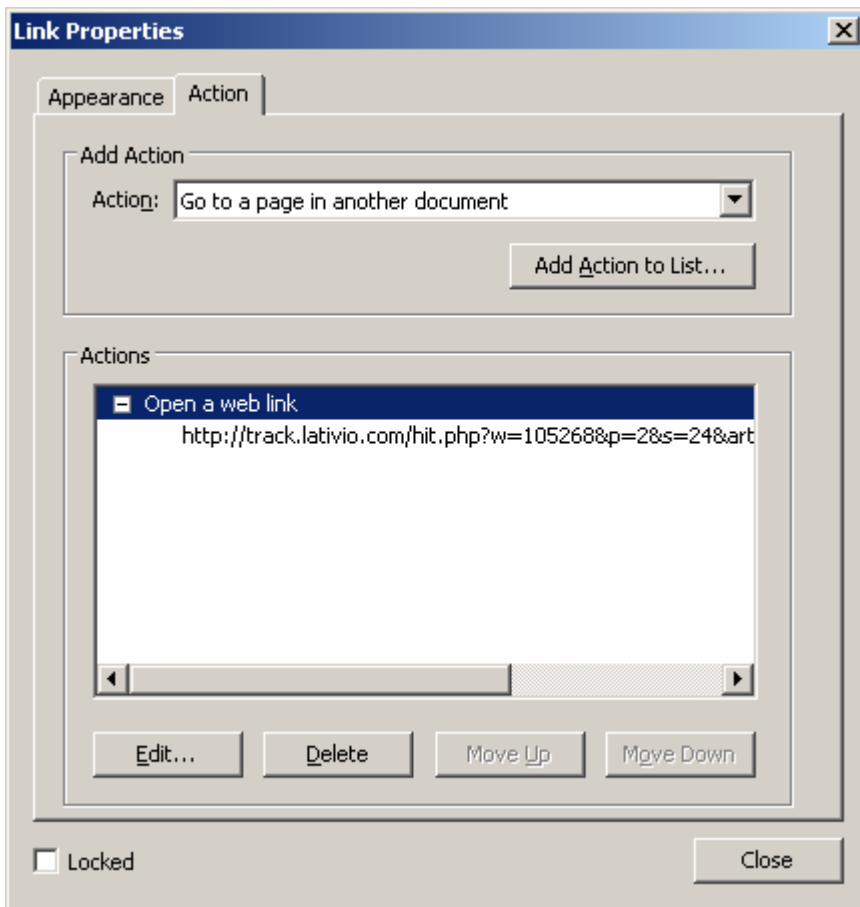

This will open the Link Properties window, which is pretty similar to link creation. This time, there is two tabs.

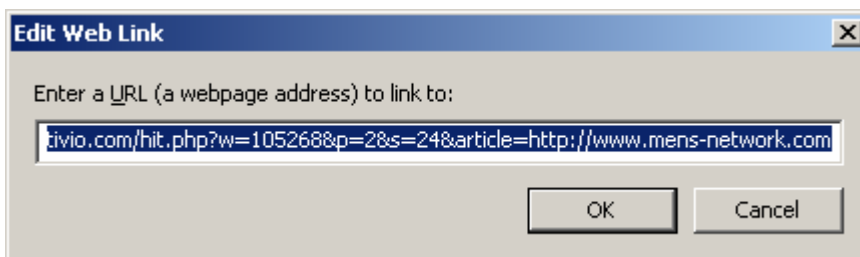

In *Appearance* tab you can edit the link properties.

The other tab is *Action*. Click on it and click on the “open a web link” so it marked as selected.

Now, if you click the *Edit* button, the link editing box will pop up. Replace it with your ID or completely new linking code. Once your changes are made, click Ok for this window and Close for parent window.

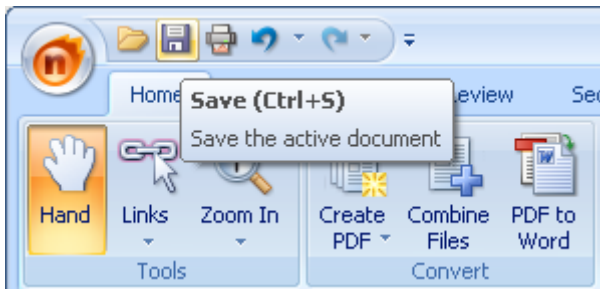

You can get your linking codes from webmaster area. They are located here:

<http://webmasters.moreniche.com/webmasters/index.php?maina=links>

The difference between inserting a new link and editing links is that your newly inserted link will have blue lines around text and images, while old links will remain as underlined, unless, you change it by setting the same Appearance settings as you used for your newly created links.

Once you have edited all the links, click on the save button (shown as diskette) or you can click **CTRL + S**.
